a) PHP 4

b) PHP 5

c) PHP 5.3

d) PHP 6

36. Which one of the following functions is used to determine whether a class exists?

a) exist()

b) exist_class()

c) class_exist()

d) __exist()

37. In the PHP code given below, what is/are the properties?

```
<?php
class Example
{
public $name;
function Sample()
{
echo "This is an example";
}
}
?>
```

a) echo "This is an example";

b) public \$name;

c) class Example

d) function sample()

38. Which keyword is used to refer to properties or methods within the class itself?

a) private

b) public

c) protected

d) \$this

39. Which keyword allows class members (methods and properties) to be used without needing to instantiate a new instance of the class?

a) protected

b) final

c) static

d) private

40. Which one of the following is the right way to clone an object?

a) `_clone(targetObject);`

b) `destinationObject = clone targetObject;`

cwipedia.in

c) destinationObject = _clone(targetObject);

d) destinationObject = clone(targetObject);

41. Which method is used to tweak an object's cloning behavior?

a) clone()

b) __clone()

c) _clone

d) object_clone()

42. In a class diagram the class is divided into three sections, what is displayed in the first section?

a) Class Attributes

b) Class Declaration

c) Class Name

d) Class Functions

43. + is the visibility code for?

a) Public

b) Private

c) Protected

d) Friendly

44)The keyword used to work with static properties in static method is-----

a)static

b)abstract

cwipedia.in

c)self

d)final

45)The operator used to find whether an object is instantiated is called as-----

a)relational operator

b)arithmetic operator

c)instance of operator

d)logical operator

46) A method which prevents child class from overriding or overloading is called as-----

a)final

b)abstract

c)polymorphism

d)inheritance

47) A class which have different functionality is called as-----

a)inheritance

b)polymorphism

c)Interface

d)Abstract

48) A method used to make a copy of an object is called as-----

a) Clone

b)Instance of

c)self

cwipedia.in

d)parent

49)The method with different signatures and same method name is called as-----

a)Method overloading

b)Inheritance

c)Abstract

d)Final

50)The keyword used in inherit class is -----

a)implements

b)extends

c)try

d)final

51)PHP does not support ----- inheritance

a)Multilevel

b)Single

c)Multiple

d)Hierarchical

52)Static methods can be called using-----

a)object

b)class

c)keywords

cwipedia.in

d)methods

53)A method which cannot be inherited is called as-----

a)final

b)abstract

c)implements

d)interface

54)Default visibility of class constants is -----

a)public

b)private

c)protected

d)Default access

55)When an object is cloned php will perform -----copy of all subject properties

a)shallow

b)deep

c)Low

d)High
